EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David J. Dawsey (Reg. No. 51,044) on 22 July 2009.

The application has been amended as follows:

- a. In claim 1 line 7 the words "and wherein a single" have been replaced by the words -- wherein only a single --.
- b. In claim 1 line 8 after the words "length of the striking face" the words -- , wherein said only a single groove is horizontal to the ground when said first linear edge is horizontal to the ground and said bottom side is facing the ground, and wherein the striking face is less than .25 inch (6.4mm) thick between the sides defining the first linear edge -- have been added.
- c. Claims 3-4, 9, 11, 13, 16, 18-19, 22-24, 27 and 29 are canceled.
- d. In claim 7 line 7 the words "and wherein a single" have been replaced by the words -- wherein only a single --.
- e. In claim 7 line 8 after the words "length of the striking face" the words -- , wherein said only a single groove is horizontal to the ground when said first linear edge

is horizontal to the ground and said bottom side is facing the ground, and wherein the striking face is less than .25 inch (6.4mm) thick between the sides defining the first linear edge -- have been added.

The following is an examiner's statement of reasons for allowance: Prior to the above Examiner's amendment the Examiner is of the opinion that the claims read on head as Phelan (4,846,477) (Fig. 1) where there is only a single vertical groove on a striking face and a top or bottom edge of the striking face is able to meet the definition of a linear edge and if the head is tilted forward or backwards it is able to produce an essentially linear contact area either at the toe or heel side of the striking face. Fioretti (6,520,865, Fig. 1) has a striking face producing linear top edge and a horizontal groove but not a striking face thickness as amended above with only a single groove along a length of the striking face. Reina (D387,828) discloses two single grooves on a striking face on a flat blade. However Reina does not have a striking face having a thickness as defined by the claims as amended above or only a single groove on a striking face. Perkins (5,467,987) and White (3,333,854) also disclose faces with only a single groove and a linear edge able to hit a ball in an essentially linear contact area horizontal to the ground. However Perkins and White do not disclose a face thickness as amended above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
